

Equitorial Drilling at 100%-Owned Cat Lake Lithium Property, Manitoba

Vancouver, BC, Canada – March 19, 2018 – Equitorial Exploration Corp. (TSX-V: EXX, Frankfurt: EE1, OTCQB: EQTXF) (“Equitorial” or “Company”) is pleased to report that the Company has drilled and logged the first hole of its aggressive 1,100 meter drill program at its 100%-owned Cat Lake Lithium Property directly adjacent to the Cat Lake Mineral Project owned by Quantum Minerals Corp.

Drill Program Summary

- 1,100 m aggressive drill program of several holes
- First hole drilled and logged
- Three areas of interest:
 - Eastward extension of Quantum Minerals' Irgon Pegmatite presently being explored by Quantum Minerals
 - Follow up of 1948 drill hole reported to have encountered 48 feet (~14.63 m) of spodumene (Manitoba Government assessment file 98073 – not 43-101 compliant). No additional drilling in the area was completed.
 - Skarn associated with the Cat Lake Mine/Lithium Corp Cat Lake Mine - minimal information on the old mine site
- The drill program is headed up by Carey Galeschuk, P. Geo, a consulting geologist with extensive experience in lithium bearing pegmatites. He also serves as Qualified Person for the purpose of National Instrument 43-101.

Cat Lake Lithium Property Highlights

- Property situated directly east and along strike of Quantum Minerals' Cat Lake Mineral Project (previously Irgon Lithium Mine). During 1956-1957, the Irgon Mine was an underground mining operation for spodumene (one of the hard rock sources for Li). The pegmatite had an historic estimate of 1.25 million tons of ore grading 1.51% Li₂O (Mineral Inventory File No. 221).
- Equitorial claim block 150 m from south end of Irgon Lithium Mine shaft and approximately 93m east of the last exposed outcrop of the Irgon Pegmatite and approximately 122 m along
- 48 feet of spodumene bearing quartz were drilled in 1948 - not followed up at the time (Manitoba Assessment File 98073 - not 43-101 compliant)
- Property approximately 180km northeast of Winnipeg, Manitoba
- Excellent infrastructure - Provincial Highway 314 in southeast Manitoba cuts through the property

Cat Lake Mineral Project

QMC Quantum Minerals Corp News Release September 7, 2017 reported:

“Between 1953-1954, the Lithium Corporation of Canada Limited drilled 25 holes into the Irgon Dike and reported a historical resource estimate of 1.2 million tons grading 1.51% Li₂O over a strike length of 365 meters and to a depth of 213 meters (Northern Miner, Vol. 41, no.19, Aug. 4, 1955, p.3). This historical resource is documented in a 1956 Assessment Report by Bruce Ballantyne for the Lithium Corporation of Canada Ltd. (Manitoba Assessment Report No. 94932). This historical estimate is believed to be based on reasonable assumptions and the company/QP has no reason to contest the document’s relevance and reliability.”

The property lies within the east-trending Mayville-Cat-Euclid Greenstone Belt (“MCEGB”) located along the northern contact of the Maskwa Lake Batholith. This northern greenstone belt has a similar structural geological setting as the Bird River Greenstone Belt (“BRGB”) which is located along the southern contact of the same batholith, and is parallel to and approximately 18km to the south of the MCEGB. The property is located 20km north of the Tanco Mine Property. The BRGB hosts the world-class Tanco rare element-bearing pegmatite dike as well as numerous other lithium bearing pegmatites. The Tanco Mine went into production in 1969 and produced tantalum, cesium and spodumene (lithium). It was previously North America’s largest and sole producer of spodumene (Li), tantalite (Ta) and pollucite (Cs).

About Equitorial Exploration Corp

Equitorial is aggressively developing four 100%-owned, high-potential, lithium projects in North America. The Little Nahanni Pegmatite Group (LNPG) is a 43-101 compliant, hard rock, lithium property in the NWT. The Cat Lake Lithium Property in Manitoba, Canada is directly adjacent to the Cat Lake Mineral Project, a highly prospective Lithium property. The Tule and Gerlach Lithium Brine Projects are located in lithium-rich Utah and Nevada within easy reach of the Tesla Gigafactory #1. All four projects have demonstrated highly encouraging grades.

FORWARD LOOKING STATEMENTS: This news release contains certain forward-looking statements within the meaning of Canadian securities laws, including statements regarding the Tule, Gerlach and Little Nahanni Pegmatite Project: statements pertaining to the ability of Equitorial Exploration Corp. ("EXX"); the potential to develop resources and then further develop reserves; the anticipated economic potential of the property; the availability of capital and finance for EXX to execute its strategy going forward. Forward-looking statements are based on estimates and assumptions made by EXX in light of its experience and perception of current and expected future developments, as well as other factors that EXX believes are appropriate in the circumstances. Many factors could cause EXX's results, performance or achievements to differ materially from those expressed or implied by the forward looking statements, including: discrepancies between actual and estimated results from exploration and development and operating risks, dependence on early exploration stage concessions; uninsurable risks; competition; regulatory restrictions, including environmental regulatory restrictions and liability; currency fluctuations; defective title to mineral claims or property and dependence on key employees. Forward-looking statements are based on the expectations and opinions of the Company's management on the date the statements are made. The assumptions used in the preparation of such statements, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on forward-looking statements. The Company expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
